

Garden Hoe

Create a tool that can be used for gardening activities.

Garden Hoe expresses comfort and pleasure in gardening activities.

Middle Top: Cast stainless steel implement that adds strength, reduces mass, and imitates form contour of the handle.

Middle Bottom: Ergonomic hand contoured grips. Handles are injection molded polymer.

Center Left: Wooden forms used to create Vacuum-formed styrene pulls for implement prototype.

Center Right: Blue foam models of handle evolution. User feedback influenced form development.
